## DETAILED ACTION

### 1. Election/Restriction

A. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 73-79, drawn to an antibody which binds SEQ ID NO:2, 4, 134, 136 or 137 and hybridomas, classified in class 530, subclass 387.1.
- II. claim 80-81, drawn to a method for detecting Presenilin in a sample using an antibody, classified in class 435, subclass 7.1.

B. The inventions are distinct, each from each other because of the following reasons:

Inventions I and II are related as product and processes of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product, or (2) the product as claimed can be used in a materially different process of using that product MPEP § 806.05(h). In the instant case the antibody can be used to purify protein, or in treatment of a condition.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has *prima facie* shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

C. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).

Art Unit: 1647

In addition, in order for Applicants' election to be held fully responsive, Applicants must elect one SEQ ID NO from the group consisting of SEQ ID NO:2, 4, 134, 136 and 137. These proteins are independent and distinct and, therefore, would require independent non-overlapping searches of protein databases and of antibodies which bind these proteins.

Furthermore, if Applicants elect Group I, they are required to elect one amino acid region of SEQ ID NO:2 (amino acids 30-45, 109-120, 304-319, 346-360). An oligomer search of protein databases for one fragment of SEQ ID NO:2 to identify these fragments in the art and antibodies which bind them would not necessarily overlap a search for another fragment, or for the full-length SEQ ID NO:2.
